The following is an examiner's statement of reasons for allowance: Rejections of the appealed claims are withdrawn in light of the arguments made on appeal. The prior art does not teach or fairly suggest a polymeric sponge comprising cellular granules including cellulose fibers imbedded therein. It is agreed that the term "sponge" has a meaning which is defined by applicants' disclosure at paragraph [0020], and this term is a term of art that has a well understood meaning to the ordinary practitioner in the art. It is agreed that the term "granules" has a meaning which is defined by its "plain meaning" and is a term that has a well understood meaning to the ordinary practitioner in the art. It is agreed that the term "pliant" has a meaning which is defined by its "plain meaning".

Newly cited Sanderson et al. (5,690,996) demonstrates the arts recognition of the use of cellulose fibers in non-granulated polymeric sponge media. However, the prior art does not teach or fairly suggest the formation of a polymeric sponge comprising pliant cellular granules including cellulose fibers imbedded therein or products prepared as provided for by applicants' claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
